

# Dark Web Monitoring

SECURITY RESEARCH  
HAS SHOWN  
**60%**  
OF PASSWORDS  
**ARE REUSED.**

Security research has shown 60% of passwords are reused, causing serious risk of account takeovers via SaaS, Cloud, and network passwords.

**AGB CYBER** secures your accounts and data by continuously scanning billions of records and files for hacked credentials.

Teams are notified when passwords have been exposed so reset measures can be taken.

## LEAK SOURCES
